Guy**THOMAS**

Full Stack Developer & Front-end Expert

Location	Phone	Web	Email
San Francisco	415.827.5289	guythomas.me	guythomas.us@gmail.com

I'm a ninja with **Javascript, HTML, CSS & Python**. And I've worked with all sorts of tech including **GraphQL, D3, React, Angular** and much more - just ask me.

I've built scalable features, helped to grow engineering teams and optimised web applications. I'm passionate about the web and host my projects on my own Raspberry Pi cluster.

EXPERIENCE

2017 – Present

REFLEKTIVE

Software Engineer

San Francisco, CA

- Owned the development of major features in **React**
- Presented company sessions on **Advanced React Patterns** and **Reactive Programming**
- Optimised our **Webpack** build to reduce our bundle size with tree shaking
- **Established the Front End hiring process** to help build the team.

2014 – 2016

IBM

Developer

Melbourne, Australia

- Developed internal websites on **Bluemix** to pitch solutions to our clients
- Implemented unit testing with SOAPUI to **reduce testing cycle by 50%**
- **Developed data models** with business logic to target real-time customer behavior

EDUCATION

2017

BRADFIELD CS

Computer Architecture

San Francisco, CA

Answered questions like...

- How does a computer translate binary to something like rendering a pixel on the screen?
- How do different caching levels work in memory?
- How does CPU pipelining work?

2011 – 2013

MONASH UNIVERSITY

Bachelor of Commerce

Major in Finance & Information Technology

Melbourne, Australia

- Built systems for business administration with VBA & Excel
